About SGAC

SPACE GENERATION
ADVISORY COUNCIL

What is SGAC?

SGAC, the Space Generation Advisory Council, is an international non-governmental organization dedicated to representing the interests of young professionals and students in the space sector. With a global network of passionate individuals, SGAC provides a platform for young voices to contribute to space-related discussions and policy development. Through capacity building initiatives, networking opportunities, and advocacy efforts, SGAC empowers young people to shape the future of space exploration, utilization, and policy-making. By fostering collaboration, knowledge sharing, and international cooperation, SGAC plays a vital role in nurturing the next generation of leaders in the space industry.

What are the main goals and missions of SGAC?

- ❖ Create a global volunteer base of university students and young professionals in the space sector who have a passion for making a difference in the space sector and a commitment to action.
- ❖ Connect them to peers and top space professionals from various organizations .
- ❖ Give the next generation of space sector leadership opportunities and a voice in global space policy.

General information on the workshop

SPACE GENERATION
ADVISORY COUNCIL

The African Space Generation Workshop (ASGW) is an annual event organized by the Space Generation Advisory Council (SGAC) in collaboration with various partners. Designed to empower and engage the next generation of African space professionals, the workshop serves as a unique platform for young enthusiasts to exchange ideas, enhance their skills, and contribute to the development of the space sector in Africa. Through a combination of expert presentations, interactive sessions, and hands-on activities, ASGW offers participants the opportunity to explore diverse aspects of space science, technology, policy, and entrepreneurship. By fostering knowledge sharing, networking, and collaboration, this workshop plays a vital role in cultivating a strong and sustainable space community across the African continent.

About the 7th edition of the AF-SGW

- The 7th African Space Generation Workshop (AF-SGW) is a two-day workshop, which brings together students, young professionals, industry experts and government stakeholders from across the African continent. It provides an unparalleled opportunity for the future leaders of Africa's space sector to proactively establish strong relationships, exchange ideas and knowledge, and to collaborate on novel ways in which space technology can be utilized for the benefit of Africa. The 7th AF-SGW will take place on the 29th and 30th November 2023 in Harare, Zimbabwe.

The theme of this year's edition

- ***"A New Era for African Space Market: Unleashing Potential for Prosperity"*** signifies a transformative phase in Africa's space industry, emphasizing the untapped possibilities for economic growth and development. The workshop aims to explore space technologies, partnerships, and investments to unlock the continent's potential and drive prosperity.

About the venue of the event:

The University of Zimbabwe offers an exceptional venue for hosting events, making it a great choice for your upcoming occasion. Nestled in the heart of Harare, the university provides a beautiful and inviting environment that sets the stage for a memorable experience. The campus boasts well-maintained facilities, including spacious conference halls, state-of-the-art auditoriums, and versatile event spaces that can accommodate gatherings of various sizes.

The main topics of this year's edition

- ❖ **Space Policy and Law**
Legal Frameworks for Commercial Space Activities in Africa
- ❖ **Space Technology and Applications**
CubeSats and Small Satellite Technology for Expanding African Space Capabilities
- ❖ **Space Business & Entrepreneurship Opportunities**
Investment Strategies and Funding Mechanisms for African Space Start-ups
- ❖ **Capacity Building Opportunities**
Developing Skills and Expertise in the African Space Workforce
- ❖ **Developing and using Space Applications**
Space Applications for Agriculture and Food Security in Africa

Working groups

Delegates are assigned to one of 5 working groups geared towards tackling specific issues pertaining to the role of space in the African region. At the end of the AF-SGW, each group will have the opportunity to present their recommendations to the wider workshop audience.

Reports from all working groups are also compiled by rapporteurs and moderators and delivered to the SGAC Executive Team after thorough review. These reports are eventually presented to the United Nations Committee on the Peaceful Uses of Outer Space (UN COPUOS) in the form of recommendations and included in the SGAC Annual Report.

Overall, the working group discussions ignite a pathway for business ideas, conference papers and research for matters related to space and produce recommendations to relevant public, private and non-governmental sectors, helping to shape the future of the African space industry.
