SGAC's Global Newsletter:

Inspiring the Next Generation: Encouraging Children to Reach for the Stars

NCAC Task Force, Space Generation Advocacy & Policy Platform

Roxy Williams

In June 2024, I had the privilege of contributing to SGAC's global newsletter with an article titled "Inspiring the Next Generation: Encouraging Children to Reach for the Stars." This article focuses on the importance of motivating young minds to explore the vast possibilities within the space sector. It was a rewarding experience to share the projects I have worked on, specifically my thoughts and insights on how we can inspire children to dream big and pursue careers in space and science. Check it out [here!](#)

Author Bio:

Roxy Williams is a senior Software Engineering student at ULACIT in Costa Rica. She is the Regional Coordinator for the NCAC region in SGAC and the Special Projects Lead in the SGAC's NCAC Policy and Advocacy Task Force. Roxy founded The Black Panthers, an empowerment group for vulnerable communities in space. She was recently one of the winners of the Women's Space Awards for her contributions to the sector; Roxy is also the lead of the Diversity and Gender Equality long-term project DIVINAS (Diversity In Astronaut Selection). She won the Space Station Design

Workshop competition in the Institute of Space Systems of the University of Stuttgart and collaborated with the Brazilian Institute of Space Research on a CubeSat project. Roxy received global awards, including the SGAC Pioneer Award and the IAF Emerging Space Leader.
